

ANSH THAKUR

Chandrapur, Maharashtra, India | 9665895546 | ansht1194@gmail.com | [LinkedIn](#) | [GitLab](#)

PROFESSIONAL SUMMARY

Information Technology graduate with hands-on experience in data analysis, MIS reporting, business intelligence, and operational analytics through a Data Analytics internship and end-to-end projects. Skilled in Advanced Excel, Power BI, SQL, and Python — with practical experience in data collection, cleaning, validation, and exploratory data analysis, building interactive dashboards, automating recurring reports, and monitoring KPIs for stakeholder decision-making. Strong analytical, problem-solving, and communication skills with attention to detail suited to a structured, deadline-driven environment.

TECHNICAL SKILLS

BI & Data Visualization: Power BI (DAX, Power Query, Data Modelling), Advanced Excel (Pivot Tables, XLOOKUP, INDEX-MATCH, Dynamic Arrays, VLOOKUP, VBA, Power Query)

Programming & Databases: SQL (MySQL, Joins, Subqueries, Window Functions, CTEs), Python (Pandas, NumPy, Scikit-learn), Jupyter Notebook, Git/GitLab

Analytics: Statistical Analysis, EDA, Data Wrangling, Data Cleaning, Data Validation, Data Integrity, KPI Monitoring, MIS Reporting, Operational Reporting, Trend Analysis, Variance Analysis, Anomaly Detection, Ad-hoc Analysis, Data Reconciliation, Supply Chain Analytics, Inventory Analytics

Process & Quality: Root Cause Analysis, Data-driven Decision Making, SOP Interpretation, Quality Standards, SLA Adherence, Documentation, Stakeholder Reporting, Process Improvement

EXPERIENCE

Data Analytics Intern | Unified Mentor Pvt. Ltd.

Sep 2025 – Dec 2025

- Cleaned, validated, and quality-checked 5,000+ records using Excel and SQL, ensuring data integrity and meeting defined SLA timelines and quality standards.
- Built and maintained Power BI dashboards for weekly stakeholder MIS reporting, covering KPI monitoring, trend analysis, and business performance tracking.
- Automated recurring reporting calculations using DAX and Power Query, reducing manual effort and improving reporting turnaround time.
- Conducted exploratory data analysis (EDA) on large datasets to surface anomalies, patterns, and disruptions, translating findings into data-driven recommendations for stakeholders.

PROJECTS

Uber Mobility Demand & Revenue Analytics [[Project Link](#)]

Aug 2025

- Built a two-stage MySQL deduplication pipeline on 35,000+ trip records; applied statistical analysis to separate peak demand volume from peak growth periods.
- Identified 31.2% of trip demand concentrated in the 5–7 PM window through trend analysis using SQL and Python, informing surge-pricing and driver-incentive scheduling.
- Found airport trips generate 54.8% of revenue from 39.6% of trip volume; built Power BI dashboards for KPI monitoring, data visualization, and revenue-trend reporting.

Supply Chain Operations & Inventory Analytics [[Project Link](#)]

Sep 2025

- Analysed 7,991 orders across 47 SKUs (\$82.7M revenue, \$30.9M profit) using Python and SQL; applied variance analysis to determine whether late deliveries were warehouse-specific or network-wide.
- Decomposed delivery-time variance to find only 0.08% difference between warehouses, redirecting the data-driven recommendation from a costly per-site fix to the upstream dispatch process.
- Ran ABC classification across the SKU catalogue — 78.7% of revenue in A-tier SKUs — and built Excel dashboards with pivot tables for inventory analytics and logistics reporting.

EDUCATION

B.Sc. Information Technology — CGPA 7.26/10

Jul 2022 – May 2025

Gondwana University, Maharashtra

Professional Training: Data Science & Analytics

Jun 2025 – Nov 2025

Digital Edify Institute, Hyderabad, Telangana

CERTIFICATIONS
